

# Hunt Strategy

*Brett Stacy*

*23 May 2019*

## List of To-Do's

- Build model that generates SSB discrepancy
  - Remove all estimated parameters from CASAL except B0
  - Set `rec_mu == 1e6`
  - Lots of tags
- Extract CASAL arrays
  - catch at age
  - catch at length
  - fish scanned / recaptured
- Compare extracted arrays to catch
